

# Deauthorize Sessions

This is used if you want to **deauthorize all computers and devices** that have been **previously used to login to WALLIX Vault** with **this Account**.

Click on the **User Icon**, on the top right-hand side of the screen, to display the **User Menu**.

Click on **Account Settings** and then **My Account**. The **My Account Screen** is displayed.

Click **Deauthorize sessions**.

### Danger zone

Careful, these actions are not reversible!

Deauthorize sessions

Purge vault

Delete account

A **Confirmation Screen** is displayed.

Enter your **Master Password** and click **Deauthorize sessions** to deauthorize all previously authorized devices and computers and to log them out of the vault.

Alternatively, click **Close** to cancel the operation.

## DEAUTHORIZE SESSIONS

Concerned your account is logged in on another device? Proceed below to deauthorize all computers or devices that you have previously used. This security step is recommended if you previously used a public computer or accidentally saved your password on a device that isn't yours. This step will also clear all previously remembered two-step login sessions.

### **WARNING**

Proceeding will also log you out of your current session, requiring you to log back in. You will also be prompted for two-step login again, if set up. Active sessions on other devices may continue to remain active for up to one hour.

**Master password** (required)

 Input is required.

**Deauthorize sessions**

Close
