Disable Browser Password Manager & Export Saved Passwords

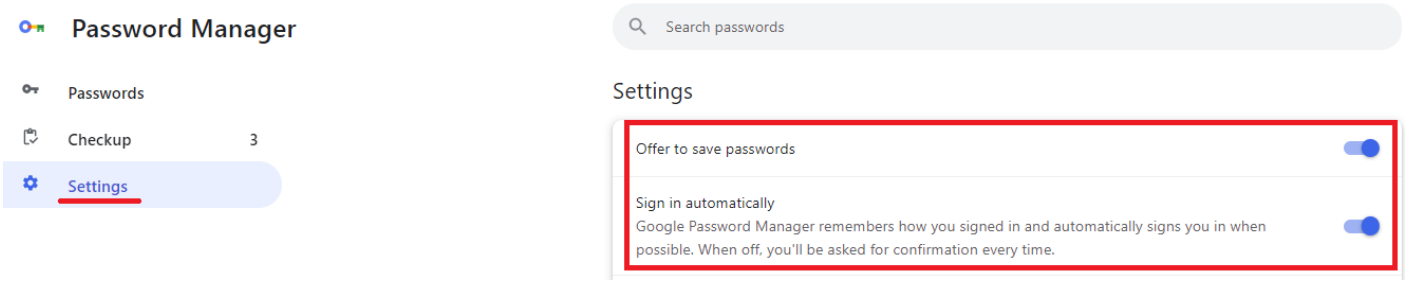

Chrome Browser

Type chrome://password-manager/passwords into the address bar.

Click **Enter**. The **Passwords Screen** opens.

Click the Settings Link in the Password Manager menu. The Settings Screen opens.

Disable Password Manager

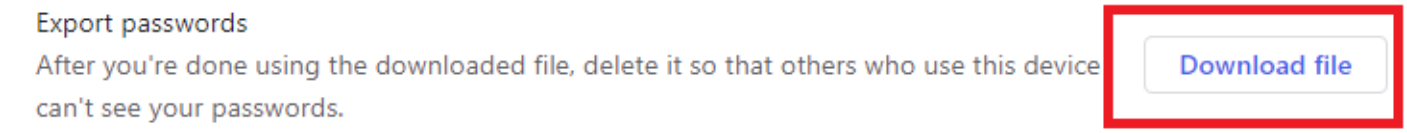

Toggle off the following **options**:

- Offer to save passwords
- Sign in automatically

The Browser **no longer** offers to **save password** or **sign in automatically** to websites.

Export Saved Passwords

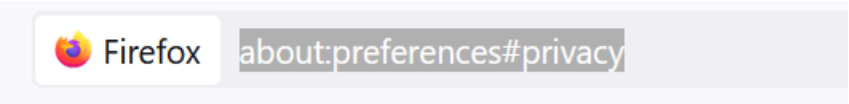

Click **Download file** beside the **Export passwords option**.

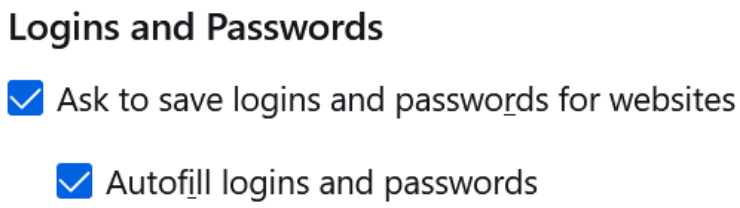

The Passwords are exported in **CSV format**.

Firefox Browser

Type about:preferences#privacy into the address bar.

Click **Enter**. The **Passwords Screen** opens.

Disable Password Manager

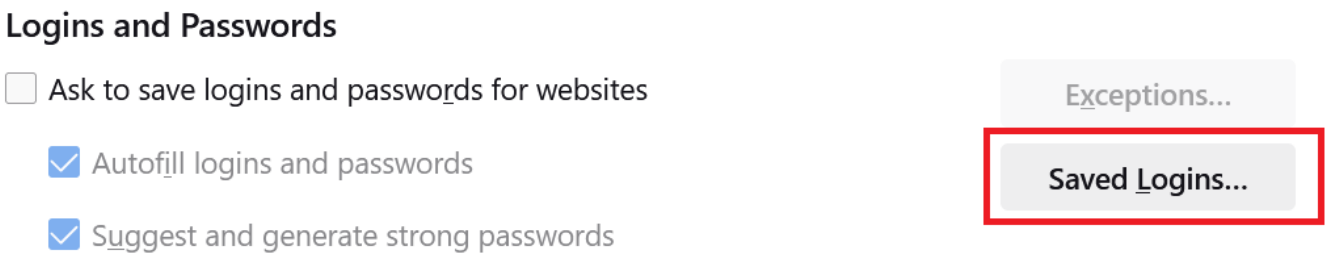

Toggle off the following **options**:

- Ask to save logins and passwords for websites
- Autofill logins and passwords

The Browser **no longer** offers to **save password** or **sign in automatically** to websites.

Export Saved Passwords

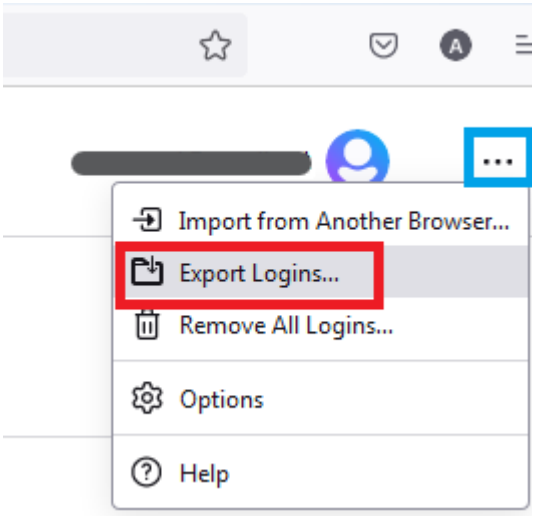

Click the **Saved Logins button** beside the Logins and Passwords options.

The Saved Passwords List is displayed.

Click the **three dots** link beside the Account name. The Context Menu is displayed.

Click the **Export Logins** Link.

The Passwords are exported in **CSV format**.
