Domain Equivalencies

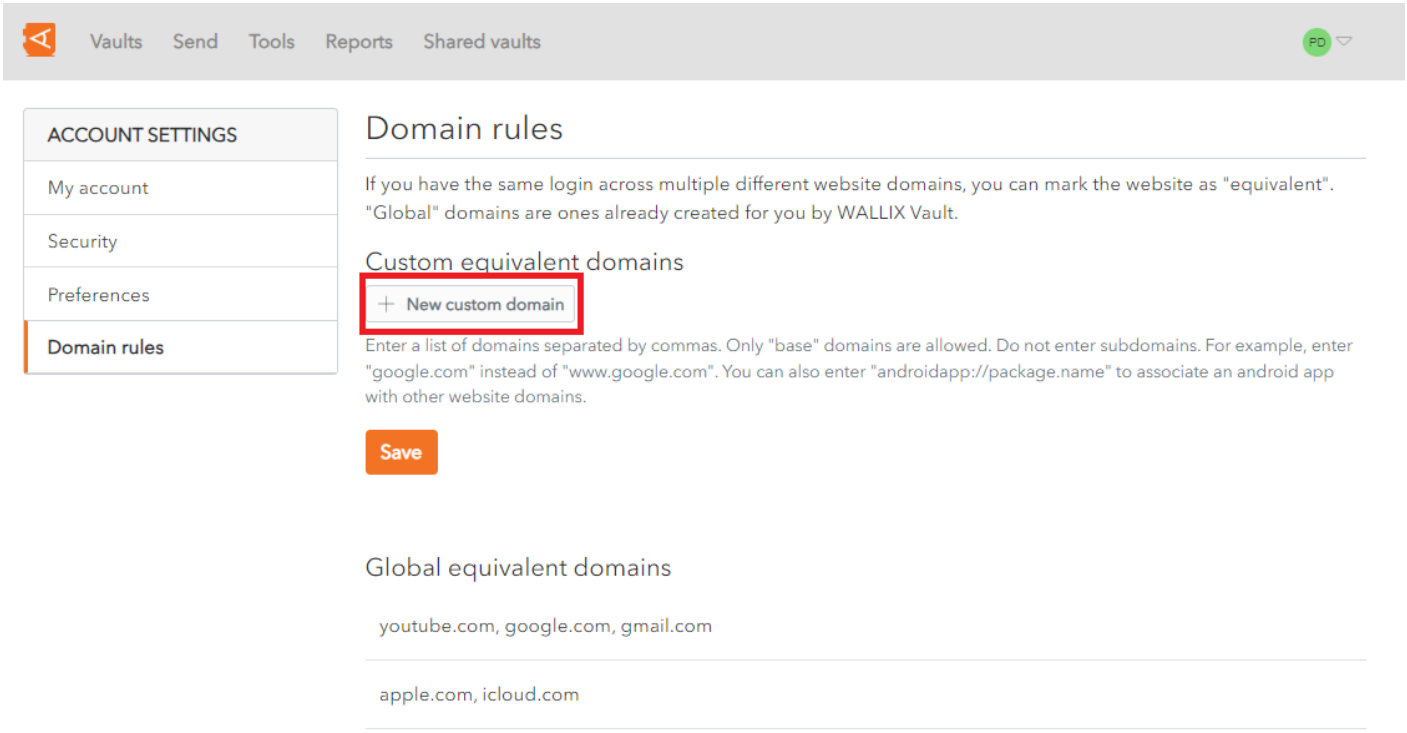

It is possible to link equivalent domains, for example, google.com, youtube.com and gmail.com.

This is useful where **mulitple domains** use the **same login credentials**.

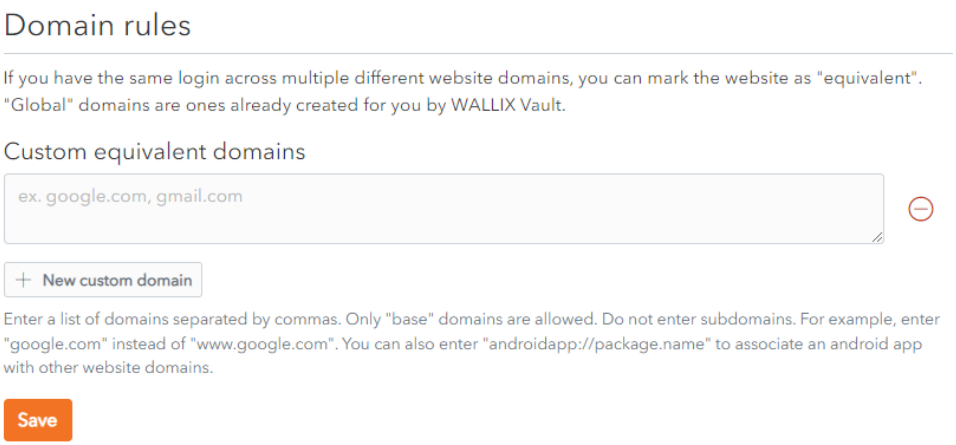

Click on the **User Icon,** on the top right-hand side of the screen, to display the **User Menu**.

Click on **Account Settings** and then **Domain Rules.** The **Domain Rules Screen** is displayed.

Click the **new custom domain** button.

Enter the **equivalent domains**, **delimited** by a **, comma**.

Click **Save** to save changes.
