Export Encrypted Vault

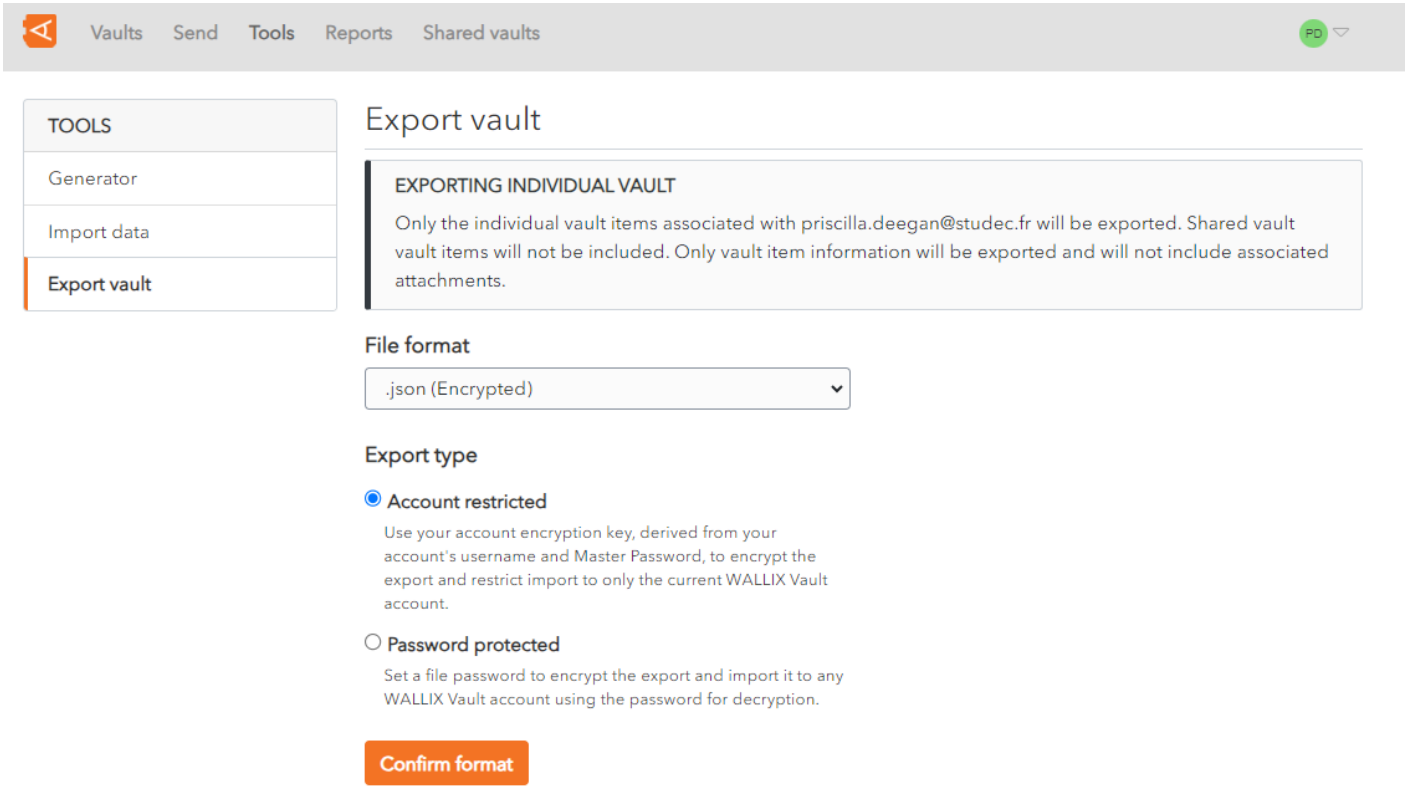

Export from Individual Vault

From the **Tools Menu,** click **Export vault link.** The **Export vault screen** is displayed.

From the **file format dropdown**, choose the **.json (Encrypted)**.

An **Export type option** appears, with **2 options** to choose from:

1. Export as Account restricted Vault

Use your **account encryption key**, derived from your account's username and Master Password, to encrypt the export.

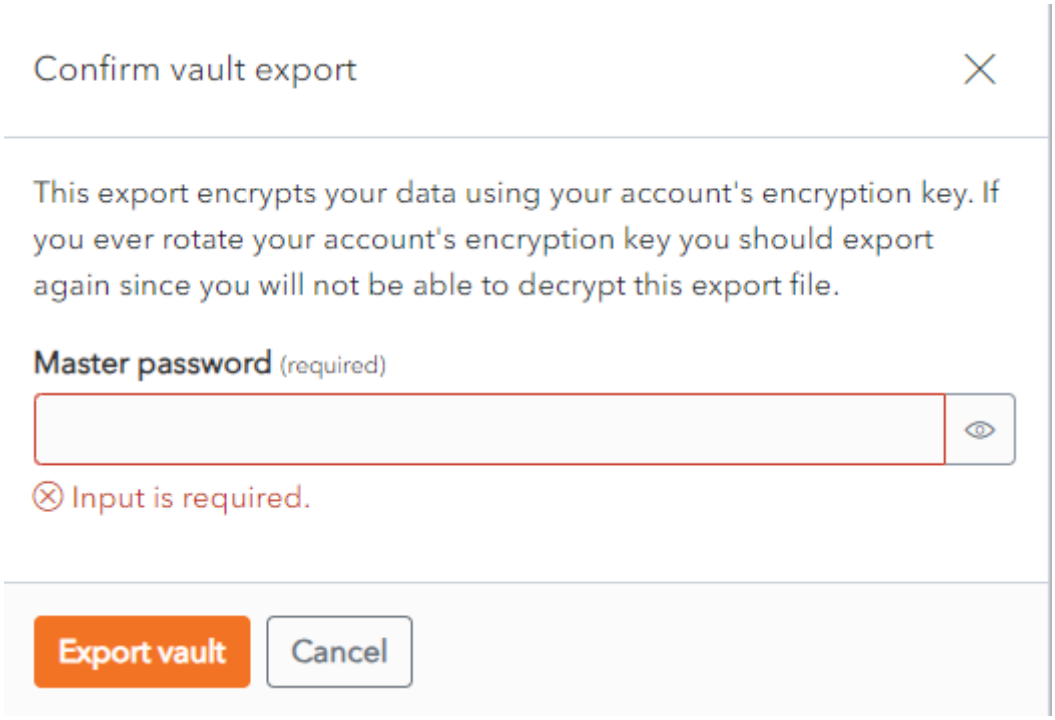

The data can only be **reimported** into the **same vault.**

Choose the **Account restricted** option.

Click **Confirm format.**

A **Confirm vault export screen** is displayed.

Enter your **Master Password** in the Master Password field.

Click **Export Vault** to export the encrypted vault.The data is **exported** to the **Downloads Folder** on your computer in **Wallix JSON format**.

> This data can **only** be **reimported** into the **same vault**.

Alternatively, click **Cancel** to cancel the operation.

2. Export as Password protected Vault

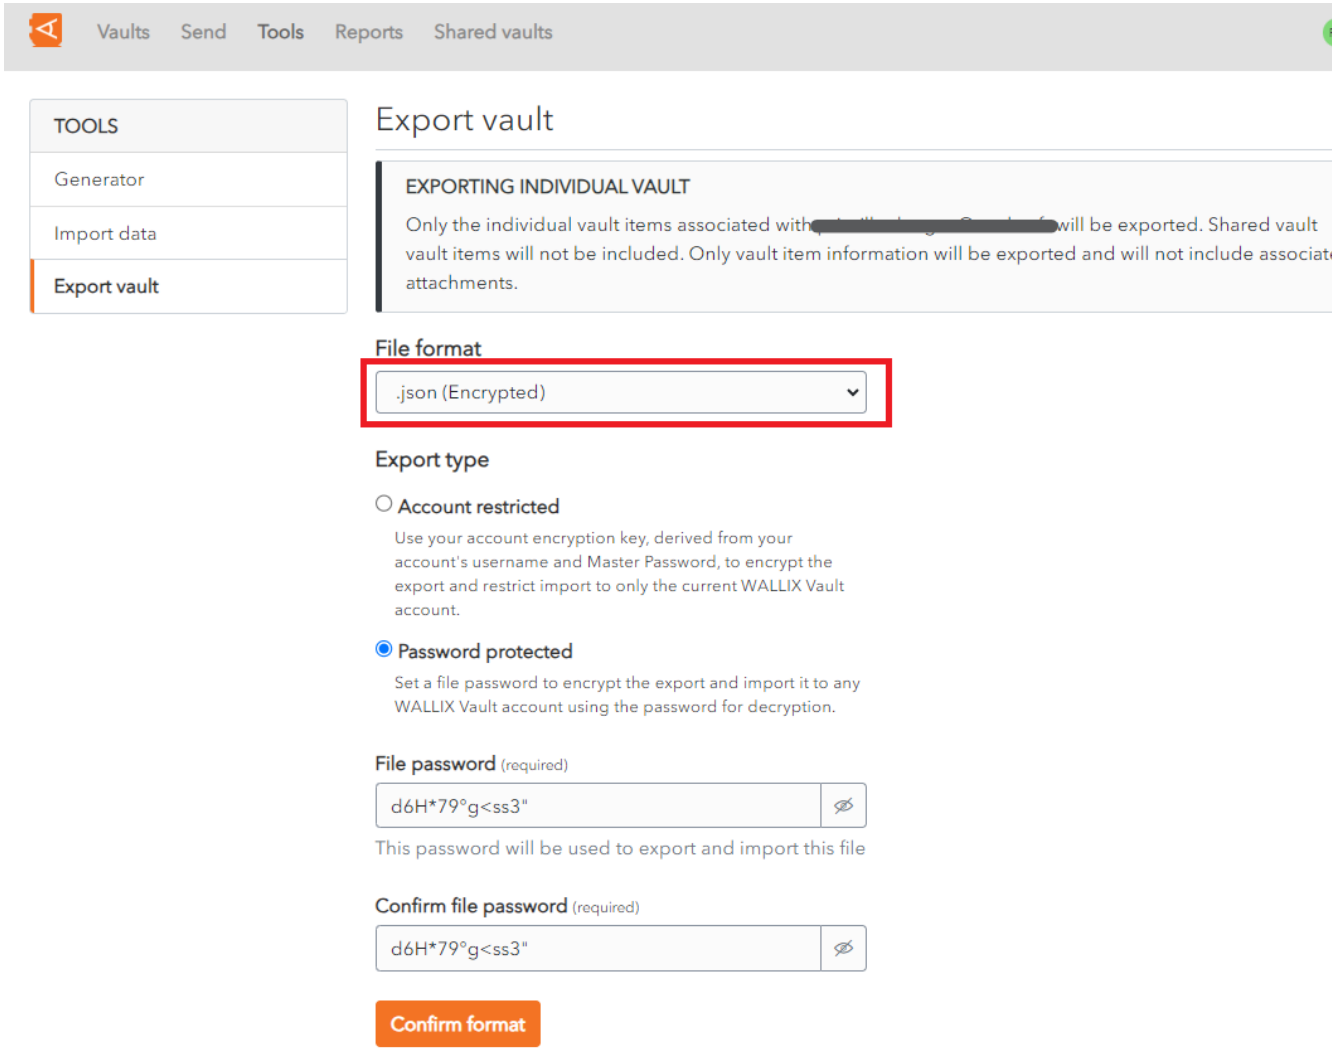

Password Protected: Use a **password** of your choosing to encrypt the export. The data can be **imported** into **any** WALLIX Enterprise **Vault**.

Choose the **Password protected** option.

2 new fields appear - **File Password** and **Confirm file password**.

Choose a **password** to encrypt your export with.

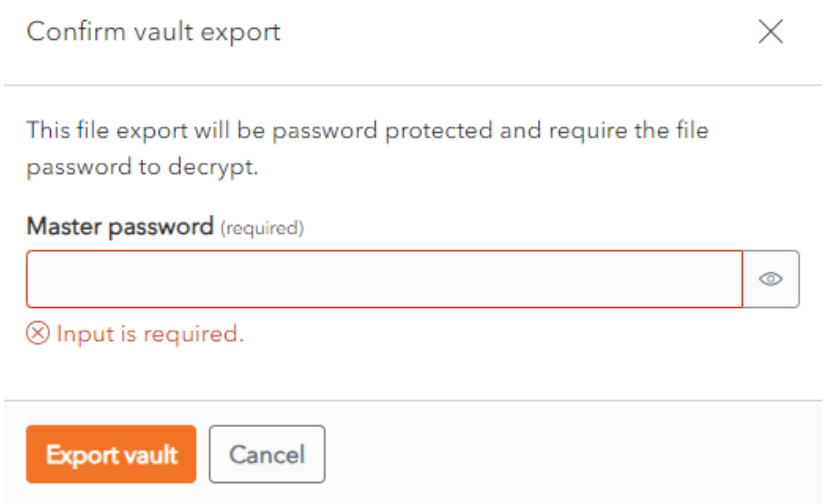

Enter your chosen password into these fields.

Click **Confirm format.**

A **Confirm vault export screen** is displayed.

Enter your **Master Password** in the Master Password field.

Click **Export Vault** to export the encrypted vault.The data is **exported** to the **Downloads Folder** on your computer.

Alternatively, click **Cancel** to cancel the operation.

> ***Note on data included in export:***

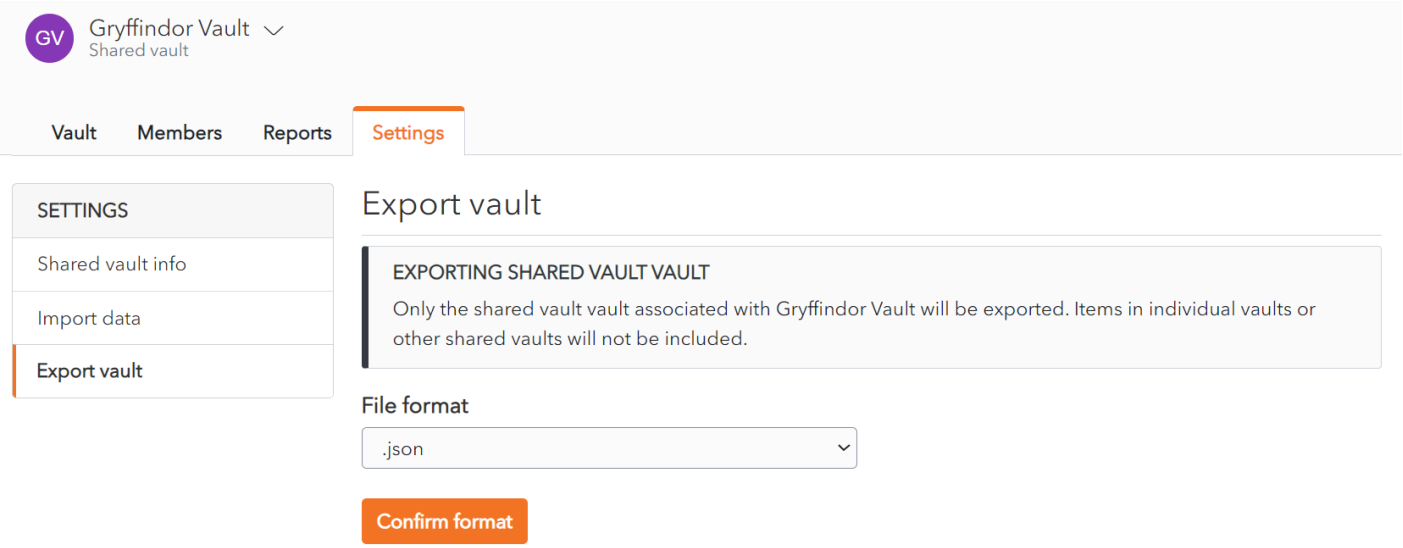

> *Only the individual vault **items associated with your account** are exported.*

> ***Shared vault items** will **not** be **included**.*

> *Only vault item information will be exported and will **not include associated attachments** .*

Export from Shared Vault

From the **Settings Screen** of the **Shared Vault chosen**, click on the **Export vault** link. The **Export Vault Screen** is displayed.

The **rest** of the procedure is the **same** as for exporting encrypted individual vault data.

> ***Note on data included in export:***

>

> ***Only** the **items** associated with the **Shared Vault selected** are **exported**.*

> ***Items** in individual vaults or **other** shared **vaults** will **not** be **included**.*
