Items Overview

You can **create four types of item** in your WALLIX Enterprise Vault :

1. A **Login** item can be used to store login information for an account.
2. A **Identity** item can be used to store identity information about a person.
3. A **Card** item can be used to store a credit or payment card information.
4. A **Secure Note** item can use used to store other private information.

Items can be **Edited** or **Deleted**.

The **Item Context Menu** contains some options related to an Item, depending on the Item Type and if it is in a **Shared Vault** or not.

Items can be **Password Protected, Cloned**, **Moved from an Individual Vault to a Shared Vault**, or **Added to Favorites**.

Specific **options** are available for **Login Items**:

- **Password Fields** such as Password Generation, Checking Password Integrity, Show / Hide Character Count, Copy Password and Show / Hide Password.
- **TOTP Generation**
- **Copy Username**
- **Copy Password**
- **Launch URI**
