Nested Collections

Collections can be **nested inside one another**. This can be done when you **Create a Collection** or when you **Edit a Collection**.

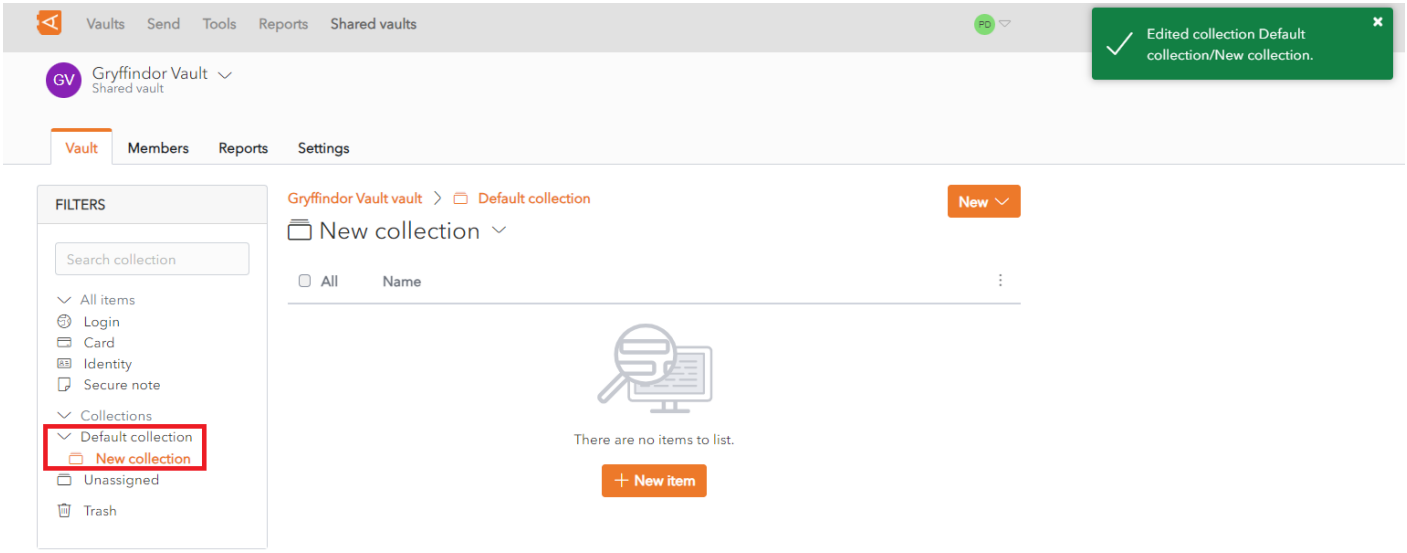

For example, there are currently **two Collections**, Default Collection and New Collection which are at the **same level**.

From the **Edit Collection Screen** for the **New Collection**, select Default Collection from the **Nest collection under** field.

Click **Save** to save the changes. **New Collection** is now at a **level below** Default Collection**.**
