Password Fields for Login Items

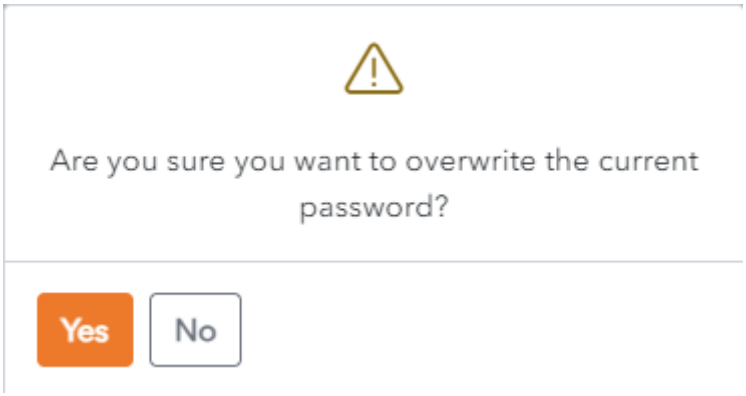

WALLIX Enterprise Vault provides different options for your Password fields to **improve** the **security** of your **passwords**.

Generate Strong Password

Click on the **Generate Password** button to generate a secure password for your login.

A pop up screen will require you to **confirm** that you wish to **overwrite** your **current password**.

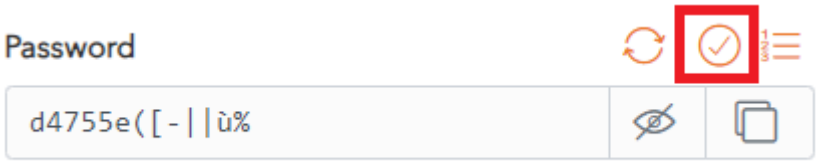

Click the **Yes** button to **overwrite your password** with the newly generated password.

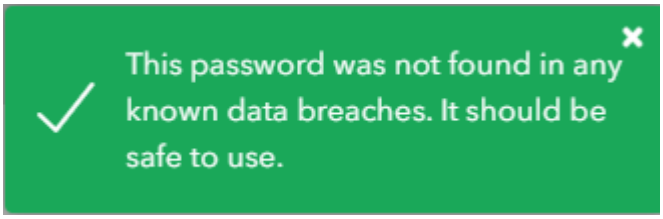

Alternatively, click on the **No** button to **keep** your **current password**.

Check Password Integrity

Click on the **Check Password** button to check if your password has been exposed.

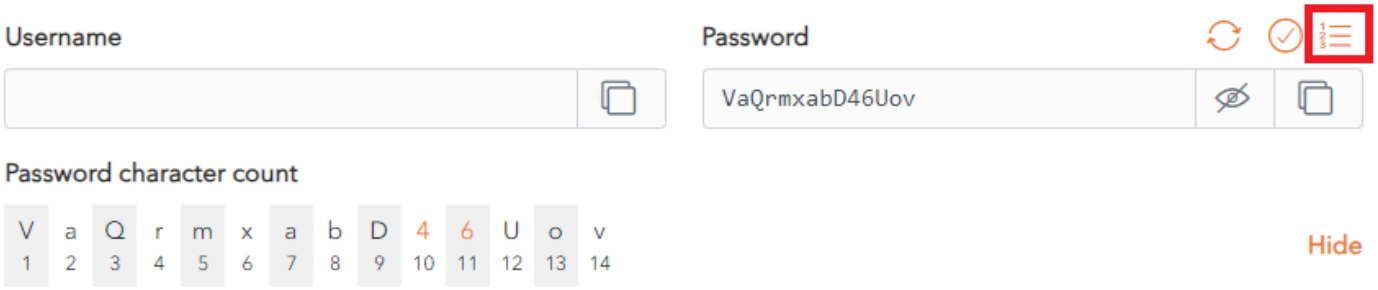

WALLIX Enterprise Vault will **check** if your **password** has been **found** in any **known data breaches**.

Show / Hide Character Count

Click on the **Toggle Character Count** button to **display** the **Password Character Count** of your password.

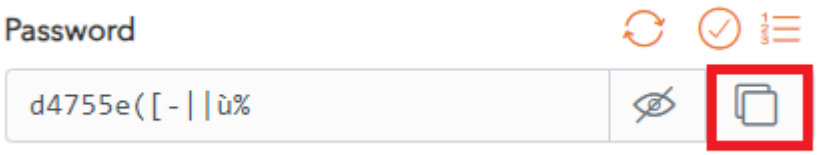

This can help you check if your password is secure enough.

Click the **Toggle Character Count** button to **hide** the Password Character Count display.

You can also click the **Hide** button to hide the Password Character Count display.

Copy Password

Click on the **Copy Password button** to copy the password entered to the clipboard.

Show / Hide Password

Click on the **Show/Hide Password toggle** button to **display** the password as you enter it.

Click again on the **Show/Hide Password toggle** button to **hide** the password.
