Reimport Encrypted Export

It is possible to **reimport** an **Exported Encrypted Vault**.

From **Tools > Import Data**, the **Import Data screen** appears.

From the **Import destination dropdown**, choose the Vault to import the data to. This is a **required** field.

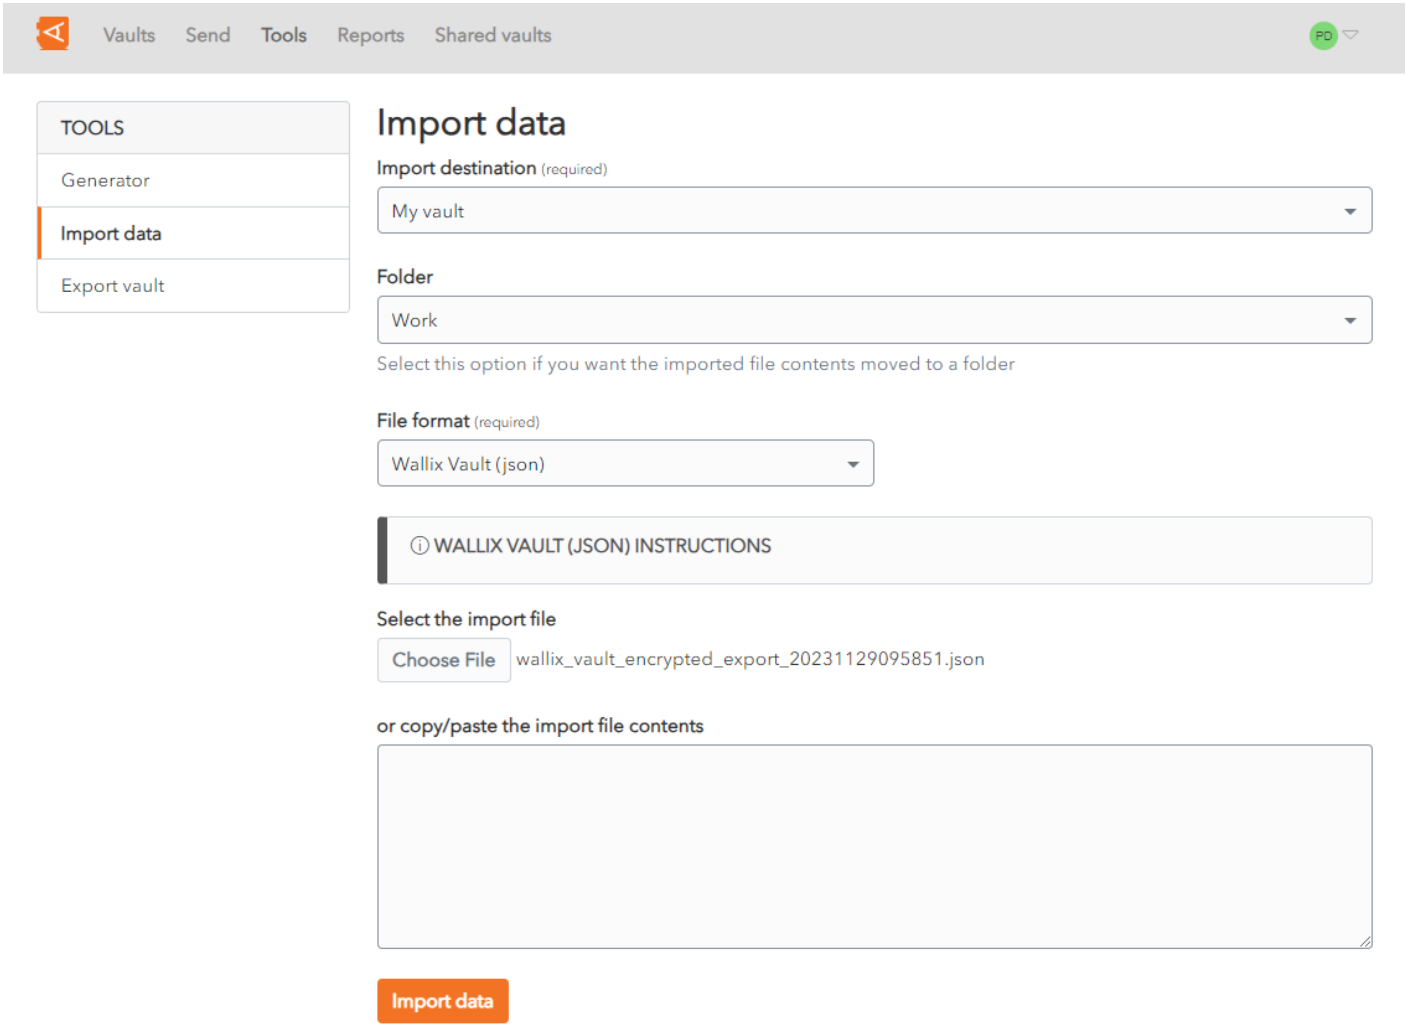

> Encrypted vaults can **only** be **reimported into** the **Vault** they were **exported from**.

From the **Folder dropdown**, choose the Folder to save the Vault data to.

From the **File Format dropdown**, choose **Wallix Vault (json) format**. This is the file format that the Encrypted Exported Vault.

From **Select the import file**, choose the encrypted vault to reimport.

Click the **Import Data button** to reimport the Encypted Exported Vault. The Vault data is **reimported** to the **specified vault and folder**.

Alternatively, click **Cancel** to cancel the operation.
