Remove Member

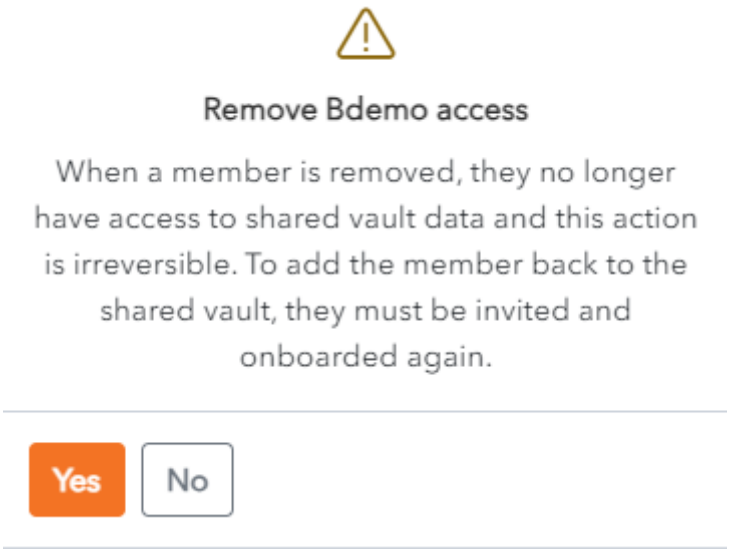

From the **Member List** in the Shared Vault, click the ⋮ **More** button beside the Member in question.

A Context Menu displays.

Click the **Remove** link.

A **Remove Member Access screen** is displayed.

Click **Yes** to **Remove the Member from the Shared Vault**. The member is removed from the Shared Vault.

Alternatively, click **No** to cancel the operation.

Note: similarly to the **Leave Shared Vault** function, this is only possible if the Member is not the last remaining member with Owner access.
