

Rename Shared Vault

From the **Shared Vault screen** in the **Settings** Tab, rename the Shared Vault in the **Shared Vault Name** field.

Click **Save** to save changes. The Shared Vault is renamed.

The screenshot displays the 'Shared vaults' management interface. At the top, a navigation bar includes 'Vaults', 'Send', 'Tools', 'Reports', and 'Shared vaults'. Below this, a header section shows the 'GV' logo and 'Gryffindor Vault' with a dropdown arrow. A sub-navigation bar contains 'Vault', 'Members', 'Reports', and 'Settings' (which is highlighted). On the left, a 'SETTINGS' sidebar lists 'Shared vault info', 'Import data', and 'Export vault'. The main content area, titled 'Shared vault info', features a 'Shared vault name' label above a text input field containing 'Gryffindor Vault'. A red rectangular box highlights this input field and the orange 'Save' button located directly beneath it. To the right of the input field is a blue circular icon with the letters 'GV'. Below the 'Shared vault info' section is a 'Danger zone' section, outlined in red, which contains a warning message: 'Careful, these actions are not reversible!'. Underneath the warning are two buttons: 'Delete shared vault' and 'Purge vault'.
