Reports

A number of reports are available in WALLIX Vault.

Click **Reports** from the **Top Menu** to access the **Reports Screen**.

Exposed passwords

Click on the **Exposed Passwords Icon** to view this report.

Exposed passwords

Passwords exposed in a data breach are easy targets for attackers. Change these passwords to prevent potential break-ins.

[Check exposed passwords]

GOOD NEWS
No items in your vault have passwords that have been exposed in known data breaches.

‹ Back to reports

Reused passwords

Click on the **Reused Passwords Icon** to view this report.

Reused passwords

Reusing passwords makes it easier for attackers to break into multiple accounts. Change these passwords so that each is unique.

GOOD NEWS
No logins in your vault have passwords that are being reused.

‹ Back to reports

Weak passwords

Click on the **Weak Passwords Icon** to view this report.

Weak passwords

Weak passwords can be easily guessed by attackers. Change these passwords to strong ones using the password generator.

GOOD NEWS
No items in your vault have weak passwords.

‹ Back to reports

Unsecure websites

Click on the **Unsecure websites Icon** to view this report.

Unsecure websites

URLs that start with http:// don't use the best available encryption. Change the login URIs for these accounts to https:// for safer browsing.

> **GOOD NEWS**
> No items in your vault have unsecured URIs.

< Back to reports

Inactive two-step login

Click on the **Inactive 2 two-step login Icon** to view this report.

Inactive two-step login

Two-step login adds a layer of protection to your accounts. Set up two-step login using WALLIX Vault authenticator for these accounts or use an alternative method.

> **GOOD NEWS**
> No websites were found in your vault with a missing two-step login configuration.
