

Restore Access to Shared Vault

From the **Member List** in the Shared Vault, click the **More** button beside the Member in question.

A Context Menu displays.

Click the **Restore Access** link.

The screenshot shows the 'MyShared Shared vault' interface. At the top, there's a header with 'MY MyShared Shared vault' and a dropdown arrow. Below the header are tabs: 'Vault', 'Members' (selected), 'Reports', and 'Settings'. The 'Members' section has a sub-header 'Members' and a filter bar with 'All 1', 'Invited', 'Needs confirmation', and 'Revoked 1'. A search bar 'Search members' and an 'Invite member' button are also present. Below the filter bar is a table with columns: 'All', 'Name', 'Collections', 'Role', 'Policies', and a menu icon. The table contains one member: 'Bdemo' with a 'Revoked' status. A context menu is open for this member, showing options: 'Member role', 'Collections', 'Restore access' (highlighted with a red box), and 'Remove'. The footer shows '© 2023 WALLIX' and 'Version 2023.1.1'.

The Member's access to the Shared Vault is restored.

The Member will be displayed in the **All Tab** of the **Member List**.
