Shortcuts

WALLIX can use **shortcuts** for certain functions:

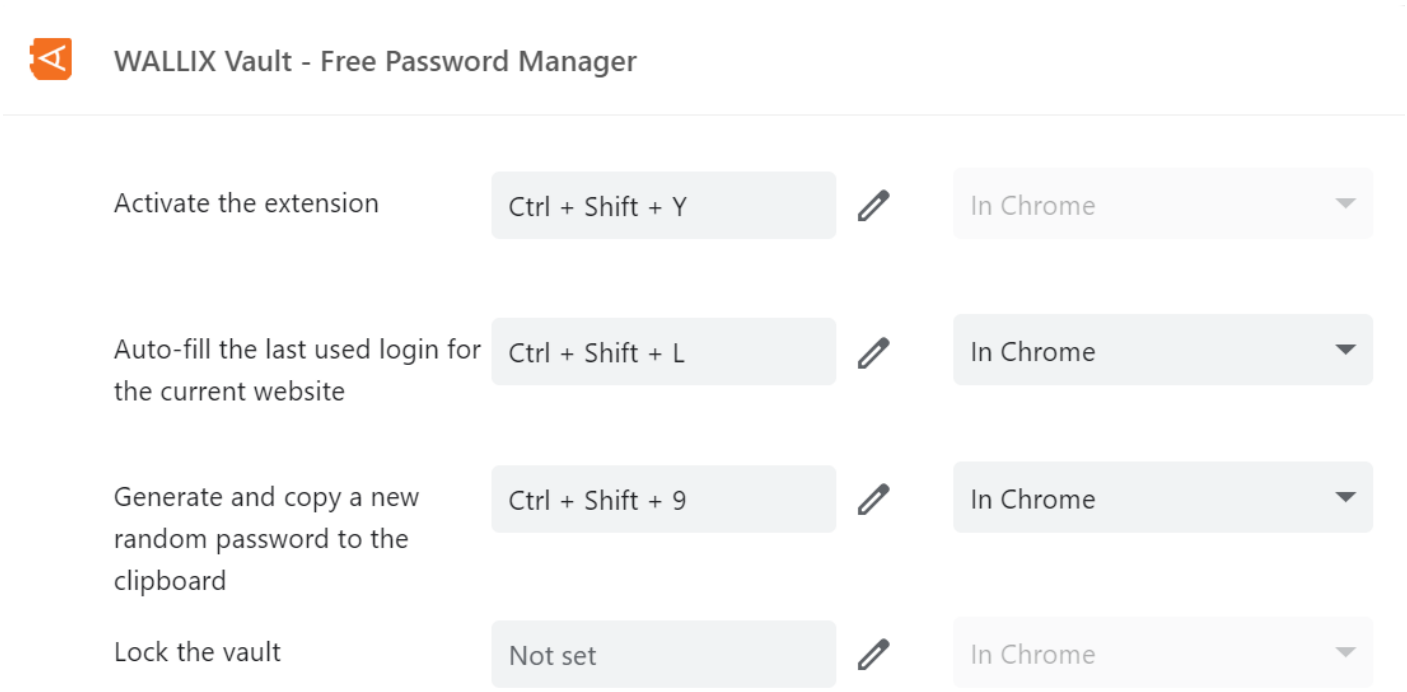

- Activate the extension
- Auto-fill the last used login for the current website
- Generate and copy a new random password to the clipboard
- Lock the vault

Shortcuts can be **configured** in the web browser.

Chrome

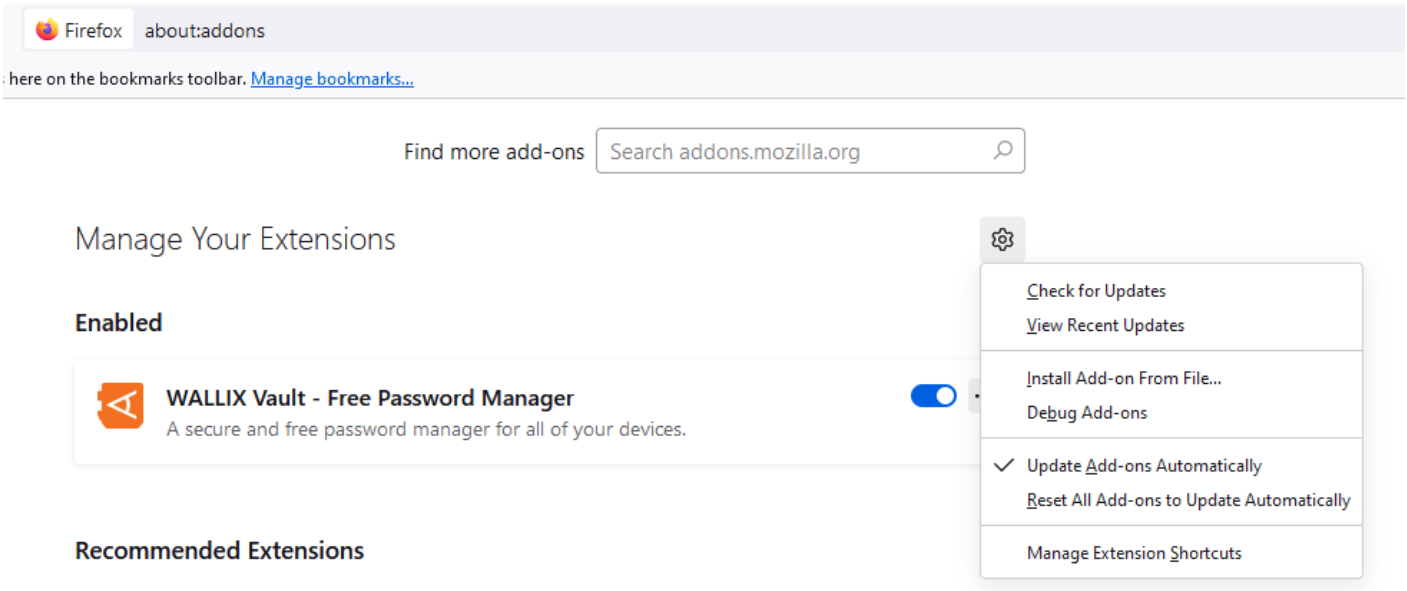

In **Chrome**, navigate to chrome://extensions/shortcut

The shortcuts are **displayed** and can be **modified**.

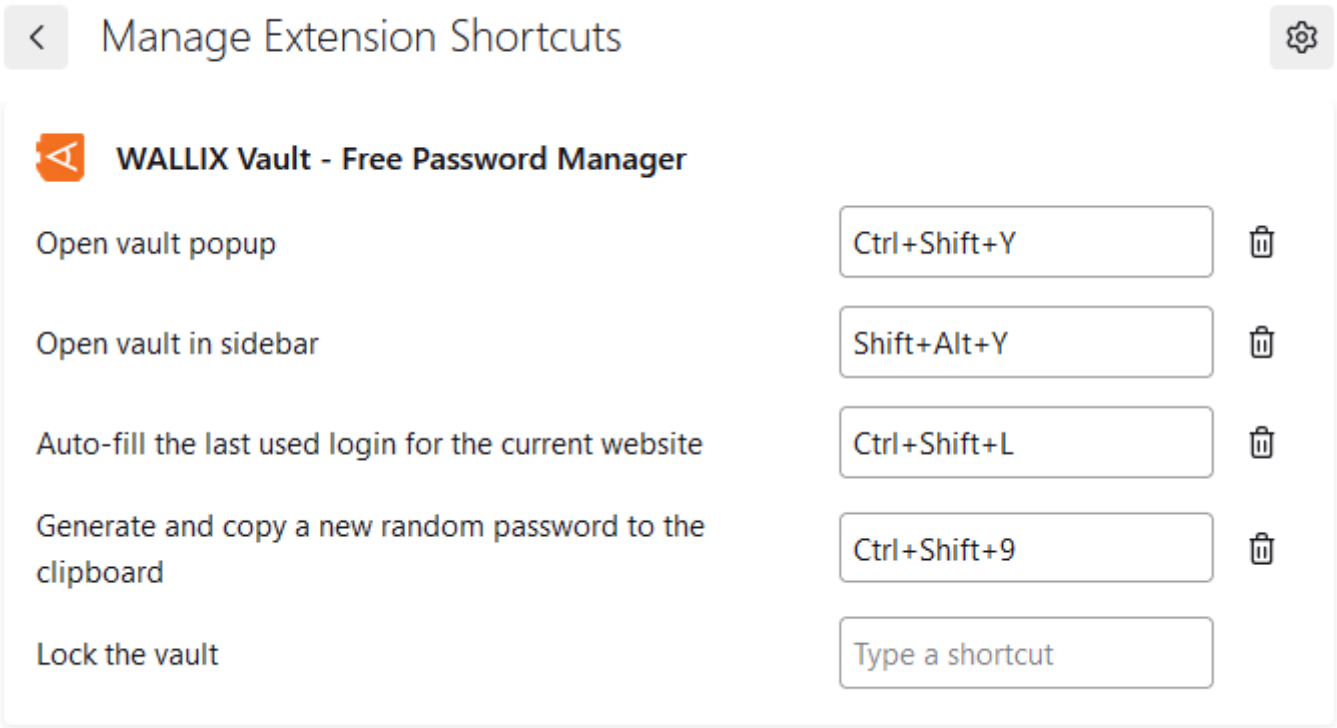

Firefox

In **Firefox**, navigate to about:addons. Then click on **Manage Extension Shortcuts** from the **Settings** context menu.

The shortcuts are **displayed** and can be **modified**.
