Unlock with PIN

Unlock with PIN is a feature that is available for WALLIX Vault for the **Browser Extension** and **Mobile apps**.

Browser Extension

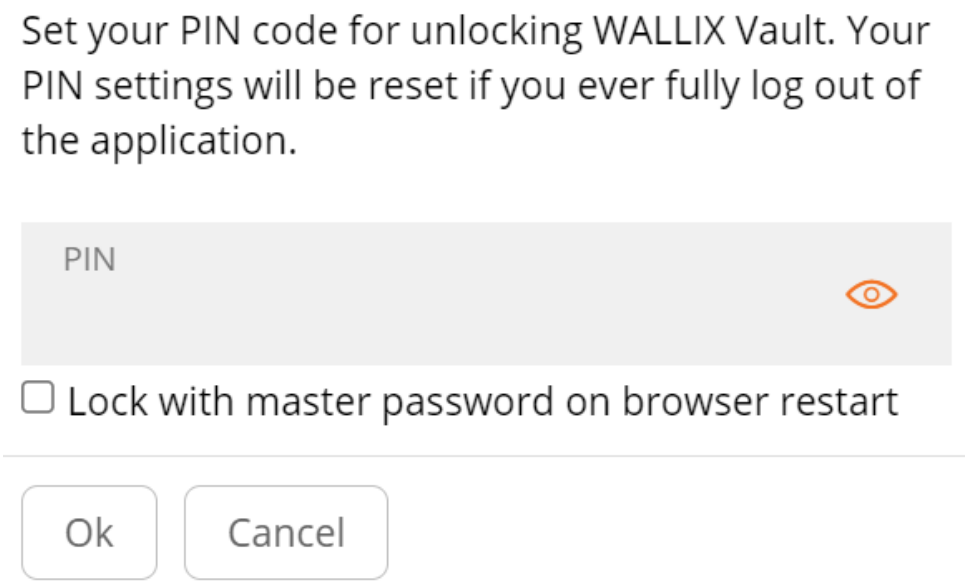

Enable Unlock with PIN

From the **Browser Extension**, click the **Settings** Menu.

Check the **Unlock with PIN** Checkbox.

A **pop up screen** is **displayed**.

Create and enter a **PIN** to use for unlocking the Vault.

The **Lock with master password on browser restart** checkbox is **checked** by **default**. This **requires** the **Master Password** after Browser Restart.

If **unchecked**, the **PIN** will be required on browser restart.

Click **Ok** to **save PIN** and **activate Unlock with PIN**.

> If the **Lock with master password on browser restart** checkbox is **unchecked**, some **sensitive data** in **memory** may **not** be **deleted** when the **browser extension** is **locked.**

Alternatively, click **Cancel** to cancel the operation.

> If you fully **log out** of the **application**, your **PIN settings** will be **reset**.

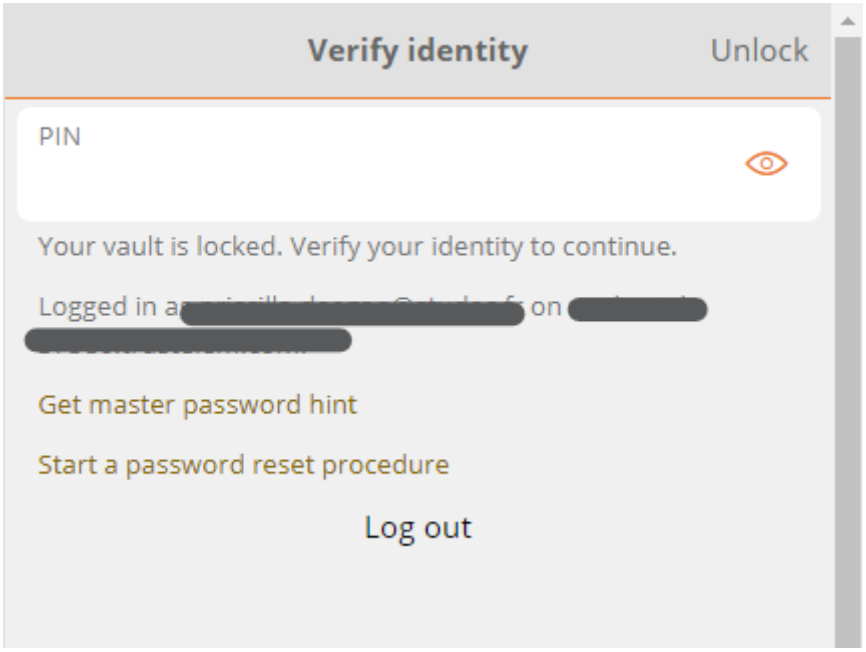

Change PIN

To **change the PIN after** it has **been set**, **disable** the **Unlock with PIN checkbox** in settings, then **reenable** it.

This will **require** a **new PIN** to be entered.

Use Unlock with PIN

When the Browser Application is **locked**, you will be **prompted** to **enter the PIN** to **unlock**.

> If the **browser is restarted**, you will be prompted to **enter either** a **PIN** or a **Master Password** to unlock. This is based on the **Lock with master password on browser restart** option chosen during PIN creation.

Mobile App

Enable Unlock with PIN

From the **Settings** tab on **WALLIX Vault Mobile App**, tap the **Unlock with PIN Code** option.

Create and enter a **PIN** to use for unlocking the Vault.

A Pop up screen appears to request if you wish to **Lock with master password on browser restart.**

Tap **Yes** to **require Master Password** on **browser restart.**

> If the **Lock with master password on browser restart** checkbox is **unchecked**, some **sensitive data** in **memory** may **not** be **deleted** when the **browser extension** is **locked.**

Alternatively, tap **No** to **require PIN** on **browser restart.**

> If you fully **log out** of the **application**, your **PIN settings** will be **reset**.

Use Unlock with PIN

When the Mobile App is **locked**, you will be **prompted** to **enter the PIN** to **unlock**.

> If the **browser is restarted**, you will be prompted to **enter either** a **PIN** or a **Master Password** to unlock. This is based on the **Lock with master password on browser restart** option chosen during PIN creation.
